

The 3rd INTERNATIONAL YOUNG RESEARCHER SEMINAR FOR ZONOSIS CONTROL, 2011

Objective:

The symposium is planned for young researchers who are currently studying at universities/research institutes in the field of zoonotic infections. The purpose of this symposium is to offer an opportunity for young participants from Japan and foreign countries to deepen their understanding of zoonoses, which threaten human health, through presentations and active discussions. The organizing committee also expects this symposium will build an active network of young scientists for future collaborations for the control of zoonoses.

Participants:

Graduate students, postgraduates and junior faculties

Sponsor & participating organizations:

Hokkaido University Global COE program

*Hokkaido University Research Center for Zoonosis Control

*Hokkaido University Institute for Genetic Medicine

*Graduate School of Medicine, Hokkaido University

*Graduate School of Veterinary Medicine, Hokkaido University

Duration:

September 16 (Fri) – September 17 (Sat), 2011

Venue:

Hokkaido University, Graduate School of Veterinary Medicine, Lecture hall

For Participation:

- (1) Language: English.
- (2) All presenters should have poster presentation concerning your research.
- (3) About 10 presenters will be selected for oral presentation from participants.

Application, dead line:

Please fill out the application form and sent it by e-mail (gcoe@vetmed.hokudai.ac.jp).

Dead line is May 27, 2011.
