

Name of Applicant: _____

Research Plan

In approximately 2,000 words, please describe your research plan after entrance to the Graduate School of Veterinary Medicine/Graduate School of Infectious Diseases at Hokkaido University. First, provide the background and purpose of the research by referring to domestic and international trends related to your prospective research field. Then, describe the materials and methods in more detail. Finally, provide the expected results and research outcome. Discuss well with your expected supervisor to complete research plan.

(attach additional pages if necessary)

[Total number of words: _____ words]
