Oct 1 (Sun)	No training
Oct 2 (Mon)	Pathologic class began from today. We thought about the cause of disease by using actual laboratory data. We create a blood smear and observe it by using microscope. I could observed a lot of acanthocytes.
Oct 3 (Tue)	We conducted autopsy after listening the clinical sign and laboratory data. It was difficult for me to cut the tissue and muscle. I thought that we could get a lot of information by conducting autopsy
Oct 4 (Wed)	We took the lecture about neurology. I understood there are a lot of inspections, and we can know where disability is by using inspections. I thought that it was important to watch the action of animals.
Oct 5 (Thu)	We took the lecture about exotic animals in the morning. I was surprised because the normal range of inspections in rabbits were entirely different from the dogs and cats. I took the lecture about swine in the evening. It was difficult to guess the cause of the acute death of the swine.
Oct 6 (Fri)	We took the lecture about equine. It was difficult for me to expect the disease and thought that it was necessary to exclude the cause of disease one by one. In addition, I thought that not only to treat the disease but also to improve the environmental maintenance.
Oct 7 (Sat)	No training

Oct 29 (Sun)	No training in Kamphaeng Saen.
Oct 30 (Mon)	I attended the school orientation in the morning. After the orientation, I went to Nongpho. The Thailand's students in my group and the doctors in Nongpho were very kind and, so I was relieved.
Oct 31 (Tue)	I could see to remove the suture after the surgery and to give antibiotics to the cow which had chronic diarrhea. I thought that it is important to give the antibiotics which have sensitivity to the patient.
Nov 1 (Wed)	I could see the cows which have white line disease and laminitis. I studied about locomotion score and feces score. I thought that it is very effective to use the block. We started to make preparation for Friday's presentation.
Nov 2 (Thu)	I also could see white line disease and laminitis. I thought that there are a lot of cause to occur hoof disease, and it is important to improve the environment of livestock.
Nov 3 (Fri)	We made preparation for the presentation in the morning. Our presentation's theme was chronic diarrhea and cystic ovary. The questions from the doctors were difficult for me to answer, but Thailand's students helped me.
Nov 4 (Sat)	No training

Nov 26 (Sun)	No training
Nov 27 (Mon)	Bovine unit began from today. We went to some farm in order to treatment the cow. I thought that the environment of farm has strong relationship to the prevalence of diseases.
Nov 28 (Tue)	I also saw some treatment, and the disease that left an impression on me the most is the udder edema. I could learn that it is important to think over before using the drug in that case.
Nov 29 (Wed)	I could see some treatment in bovine hospital, and the infected animal that left an impression on me the most is the goat which indicated the symptoms like encephalitis. I continued to observed, and the goat sometimes gave a strange sound and indicated strange actions.
Nov 30 (Thu)	The goat which I observed yesterday dead. I was sad because the thing that I could do was only physical examination. I felt that it is important to get more knowledge through this experience.
Dec 1 (Fri)	No training for VISA extension
Dec 2 (Sat)	No training
