

Organizer's Report on the 22nd Leading Seminar

Name / Grade	Nguyen Thanh Lam / third-year PhD student
Date / Place	16:00 – 18:00 November 29 th , 2017 / Lecture Hall
Number of attendees	69 students, 12 others, 2 faculty staff

Lecture title	The One Health Approach – A Holistic Perspective for an Ever More Complex Future –
Lecturer	Dr. Dirk U. Pfeiffer
Affiliation of Lecturer	- Chair Professor of One Health, College of Veterinary Medicine and Life Sciences, City University of Hong Kong, Hong Kong - Professor Veterinary Epidemiology, Royal Veterinary College, London, UK

Background of invitation	<p>The One Health approach is increasingly recognized worldwide by academic institutions as well as national/international organizations and has influenced education and research through promoting an integrated perspective on human, animal and environmental health. In line with the global demands, our Leading program named "Fostering Global Leader in Veterinary Science for Contributing to One Health" has implemented the One Health approach as the key spirit for education and research direction of postgraduate study. Dr. Pfeiffer is one of sophisticated professionals about One Health concept. Currently, he is now Chair Professor of One Health, College of Veterinary Medicine and Life Sciences, City University of Hong Kong, HK. In addition, he is also professor of Veterinary epidemiology thereby he has intensively experienced the realities in various environment in the world. Therefore, his lecture would be a great interest to all students from different disciplines in our school.</p>	
Seminar contents, questions and answers	<p>Seminar content: The 22nd Leading seminar was conducted by 2 sessions which lasted for 2 hours.</p> <ul style="list-style-type: none"> - The first session was mainly about general introduction of the invited speaker, Dr. Pfeiffer, and further information about higher education in veterinary medicine in UK and Hong Kong was introduced. Within 20 minutes of the first session, Dr. Pfeiffer explained his career experience in different countries and showed photos in the field reality during his career. These information really inspired PhD students for their future career path relevant to veterinary. In this session, we received 3 questions which mentioned about veterinary study in UK and Hong Kong and its structure of veterinary courses. - The second session is the main topic of the Leading Seminar. In this session, Dr. Pfeiffer mainly focused on the impacts of One Health concerning its translation into policy and societal impact. He emphasized the need that future One Health requires more effective intersectoral collaboration and the critical roles of medicine, veterinary and social sciences for more effective policy translation. We had interactive discussion and question then Dr. Pfeiffer gently gave his discussion and advices to students with flexible perspectives in each specific context.

Date	Activity																
15:00, 28 th Nov	Welcome at New Chitose airport																
09:30 – 09:45, 29 th November	Greeting from Prof. Sakoda																
10:00 – 11:30, 29 th November	Closed seminar of Lab. Microbiology																
13:00 – 14:00, 29 th November	Visit Zoonosis Control Center (CZC)																
16:00 – 18:00, 29 th November	Special Leading seminar																
10:45 – 14:00, 30 th November	Visit Sapporo Olympic Museum																
14:30, 30 th November	Back to airport																
Impressions and opinions	<p>Reflection point: After the Leading seminar, I did a short online survey for asking attendants' reflection regarding the content and organizing activities. The results were indicated in the figures below. Briefly, 28 students gave their reflection for the seminar. Most of students agreed that this seminar met their expectation and satisfied with the seminar. However, we also need to consider other suggestions for improving forthcoming Leading seminars. For example, duration of the seminar is quite long, or the topic is too general, or native speaker might need to speak slowly for better understanding to all attendants.</p> <p>Reulst of survey:</p> <div> <div> <p>The seminar met your expectations? 28 responses</p>  <ul style="list-style-type: none"> Strongly agree Agree Disagree Strongly disagree </div> <div> <p>The seminar was helpful to your research, education or way of thinking? 28 responses</p>  <ul style="list-style-type: none"> Strongly agree Agree Disagree Strongly disagree Talk was very interesting to expand our knowledge, but it was too general topic. </div> <div> <p>Altogether, you are satisfied with the seminar? 28 responses</p>  <ul style="list-style-type: none"> Strongly agree Agree Disagree Strongly disagree </div> <div> <p>The length of the seminar was: 28 responses</p>  <ul style="list-style-type: none"> Too short Too long Appropriate </div> </div> <p>Impressions and opinions: I believe that the 22nd Leading Seminar has provided positive impacts and inspired students to the One Health approach. One of the most significance of the seminar is to show the reality in different situations worldwide which might emphasize importance of our roles as veterinarians or medicine for the contribution to the world and our future. In addition, we have realized that collaboration from multi-disciplines is also critical element for our career path. We are now gathering in the Leading program which would be great advantages for future collaboration. Overall, I could successfully invite a world-class researcher and organized a leading motivational seminar for PhD students. Furthermore, I could set up a good relationship between Dr. Pfeiffer and our school, our laboratory and myself for future communication. Personally, I would like to give my deep acknowledgements to the Steering Committee of the Leading program for accepting my proposal, to the Leading Office (Maki and Terashima san) for kind arrangements and supports, to all member of Laboratory of Microbiology for kind supports and all PhD students and staffs for joining the seminar.</p>
