| Name | Mohamed Abdallah Mohamed Moustafa |
| Laboratory | Wildlife Biology and Medicine |
| Year (Grade) | D4 |
| Destination | Atlanta, Georgia, United States of America |
| Period of trip | 2015/08/23 to 2015/08/28 |
| Purpose of trip | Attending the International Conference on Emerging Infectious Diseases. |

Summary of activities (about 800 words, provide photos, tables and figures that clearly show the activities during the period)

The International Conference on Emerging Infectious Diseases (ICEID2015) included plenary and panel sessions with invited speakers as well as oral and poster presentations on emerging infections. Major topics included are current work on surveillance, epidemiology, research, communication and training, bioterrorism, and preventions and control of emerging infectious diseases, both in the United States and abroad.

This conference was organized by CDC in collaboration with the American Society for Microbiology, the

Association of Public Health Laboratories, the Council of State and Territorial Epidemiologists, and the World Health Organization, with additional support from more than 25 multidisciplinary public health partners.

This conference gathered hundreds of health experts from several countries. It was amazing to get in contact with these experts and having their advices and experiences. From day one, I could get in touch with highly prestigious scientists from USA, Canada, France, Japan, Egypt and Korea.

During the conference, I have attended many amazing talks and discussions. During my poster presentation, I had very useful advices and requests for collaboration
