Summary of activities (about 800 words, provide photos, tables and figures that clearly show the activities during the period)

The American Society for Bone and Mineral Research (ASBMR) is a professional, scientific and medical society established to bring together clinical and experimental scientists who are involved in the study of bone and mineral metabolism.

The ASBMR membership comprises basic research scientists, and clinical investigators in bone and mineral metabolism and related fields along with physicians and other healthcare practitioners. Current worldwide membership numbers approximately 4,000 with interests in biomechanics, cell biology, molecular biology, dentistry, developmental biology, endocrinology, epidemiology, internal medicine, metabolism, molecular genetics, nephrology, obstetrics-gynecology, orthopaedics, pathology, pharmacology, physiology, rheumatology and other research/clinical areas. The ASBMR 2015 Annual Meeting is my opportunity to learn side-by-side with the leading minds in bone and mineral research. With a variety of networking opportunities, including the Young Investigator Reception and daily morning networking sessions, I was sure to expand and strengthen my network of colleagues. With more than 100 sessions to choose from, including Meet-the-Professor series, Plenary Oral presentations and topical symposia, and sure to leave the Annual Meeting armed with new ideas and information. Schedule of the program for each day is displayed in below.
